

BENJAMIN JIAHONG ZHANG

CURRENT POSITION	Postdoctoral Research Associate and Lecturer Department of Mathematics and Statistics, University of Massachusetts Amherst	
CONTACT INFORMATION	Lederle Graduate Research Tower Room 1632 University of Massachusetts 710 N. Pleasant Street Amherst, MA 01003	Email: bjzhang@umass.edu Website: benjzhang.github.io
EDUCATION	Massachusetts Institute of Technology , Cambridge, MA	02/2022
	<i>PhD, Computational Science and Engineering</i> <ul style="list-style-type: none">• Thesis: <i>Efficient sampling methods of, by, and for stochastic dynamical systems</i>• Committee: Y. Marzouk, T. Sahai, T. Sapsis, K. Spiliopoulos	
	<i>SM, Aeronautics and Astronautics</i> <ul style="list-style-type: none">• Thesis: <i>A Coupling Approach to Rare Event Simulation via Dynamic Importance Sampling</i>• Advisor: Y. Marzouk	06/2017
	University of California, Berkeley , Berkeley, CA	05/2015
	<i>BS, Engineering Physics</i> <i>BA, Applied Mathematics</i> , Concentration in Numerical Analysis <ul style="list-style-type: none">• Graduated Highest Honors in Applied Mathematics, Distinction in General Scholarship• Thesis: <i>A Computational Study of Seizure Attenuation via Anderson Localization</i>• Advisors: M.-R. Alam (Mechanical Engineering), P. Persson (Mathematics)	
RESEARCH INTERESTS	Mathematics of data science, Rare event simulation, Bayesian computation, Generative modeling, Data-driven methods for dynamical systems, Data assimilation	
RESEARCH EXPERIENCE	Department of Mathematics & Statistics, UMass Amherst <i>Postdoctoral Research Associate</i> Mentors: Markos Katsoulakis, Luc Rey-Bellet, Paul Dupuis (Brown University)	Amherst, MA 09/2022 - Present
	Department of Aeronautics and Astronautics, MIT <i>Postdoctoral associate</i>	Cambridge, MA 01/2022 - 08/2022
	<i>Research assistant</i> Supervised by Professor Youssef Marzouk in the Uncertainty Quantification group.	09/2015 - 01/2022
	Department of Mechanical Engineering, UC Berkeley <i>Undergraduate research assistant</i> Supervised by Professor Reza Alam.	Berkeley, CA 09/2013 - 08/2015
TEACHING EXPERIENCE	Department of Mathematics and Statistics, UMass Amherst <i>Lecturer</i> Designing and delivering new course on Mathematical Machine Learning (MATH 590STA).	Amherst, MA 02/2024 - 05/2024
	Department of Aeronautics and Astronautics, MIT <i>Course developer</i> Designed and co-wrote curriculum for MIT xPro online course on Modeling, Simulation, and Machine learning for working professionals.	Cambridge, MA 12/2019 - 04/2020
	<i>Teaching assistant</i> Undergraduate probability & statistics for aerospace engineering. Awarded best teaching assistant	01/2019 - 05/2019

award by the students.

Course developer and co-instructor

Spring 2018, 2019

Designed curriculum and co-taught course for 16.S685 “A hands-on introduction to computational engineering,” an introductory course targeted at first and second year undergraduates.

Seminar XL instructor

09/2018 - 05/2019

Lead small 18.03 (Differential Equations) study groups for first year URM students. Facilitated by the MIT Office of Minority education.

Teaching assistant and grader

09/2018 - 12/2018

Graduate class on numerical methods for stochastic processes and inference. Also served as informal teaching assistant and held office hours.

Subject Design Certificate Program

07/2020

From the MIT Teaching and Learning lab.

Department of Mathematics, UC Berkeley

Berkeley, CA

Teaching assistant

01/2015 - 05/2015

Second semester introductory calculus (Math 1B).

PROFESSIONAL
EXPERIENCE

United Technologies Research Center, UTC

Berkeley, CA

Research intern

06/2017 - 09/2017

Researched queuing systems for modeling human operators. Also investigated using quantum computing for optimization.

PUBLICATIONS

Journal articles

MENTORING

Master's theses advised:

- Joshua W. (MIT AeroAstro) 2021 – 2022
Thesis: Rare event simulation via tensor-based approaches to stochastic optimal control

Undergraduate research students advised:

- Ben B. (UMass Amherst REU, Honors Thesis) 2023 – 2024
- Alex R. (UMass Amherst REU) 2023

	<ul style="list-style-type: none"> • Joshua W. (MIT UROP, SuperUROP) 2019 – 2021 • Karolina P. (MIT UROP) 2018 – 2019

WORKSHOPS
ATTENDED

8. Optimal Transport in Data Science, Institute for Computational and Experimental Research in Mathematics (ICERM), Brown University, May 8-12, 2023.
7. Data Assimilation – Mathematical Foundation and Applications, Mathematisches Forschungsinstitut Oberwolfach (MFO, Oberwolfach Research Institute for Mathematics) , February 20-26, 2022.
6. “I Can’t Believe It’s Not Better” Workshop at the Neural Information Processing Systems Conference (NeurIPS) 2021, held virtually, December 13, 2021.
5. Second Symposium on Machine Learning and Dynamical Systems, Fields Institute for Research in Mathematical Sciences, University of Toronto, September 21-29, 2020.
4. Mathematical Optimization of Systems Impacted by Rare, High-Impact, Random Events, Institute for Computational and Experimental Research in Mathematics (ICERM), Brown University, June 24-28, 2019.
3. Optimal Transport: Numerical Methods and Applications, Lake Como School of Advanced Studies, May 7-11, 2018.
2. USACM Workshop on Uncertainty Quantification and Data-Driven Modeling, Austin TX, March 23-24, 2017.
1. Summer School in Monte Carlo Methods for Rare Events, Division of Applied Mathematics, Brown University, June 13-17, 2016.
