

# BENJAMIN JIAHONG ZHANG

---

CURRENT POSITION	Postdoctoral Research Associate Department of Mathematics and Statistics, University of Massachusetts Amherst
CONTACT INFORMATION	Lederle Graduate Research Tower Room 1632 University of Massachusetts 710 N. Pleasant Street Amherst, MA 01003 Email: <a href="mailto:bjzhang@umass.edu">bjzhang@umass.edu</a> Website: <a href="https://benjzhang.github.io">benjzhang.github.io</a>
EDUCATION	<b>Massachusetts Institute of Technology</b> , Cambridge, MA 02/2022 <i>PhD, Computational Science and Engineering</i> <ul style="list-style-type: none"><li>Thesis: <i>Efficient sampling methods of, by, and for stochastic dynamical systems</i></li><li>Committee: Y. Marzouk, T. Sahai, T. Sapsis, K. Spiliopoulos</li></ul> <b>SM, Aeronautics and Astronautics</b> 06/2017 <ul style="list-style-type: none"><li>Thesis: <i>A Coupling Approach to Rare Event Simulation via Dynamic Importance Sampling</i></li><li>Advisor: Y. Marzouk</li></ul> <b>University of California, Berkeley</b> , Berkeley, CA 05/2015 <i>BS, Engineering Physics</i> <i>BA, Applied Mathematics</i> , Concentration in Numerical Analysis <ul style="list-style-type: none"><li>Graduated Highest Honors in Applied Mathematics, Distinction in General Scholarship</li><li>Thesis: <i>A Computational Study of Seizure Attenuation via Anderson Localization</i></li><li>Advisors: M.-R. Alam (Mechanical Engineering), P.-O. Persson (Mathematics)</li></ul>
RESEARCH INTERESTS	Mathematics of data science, Mathematics of generative modeling, Rare event simulation, Bayesian computation, Data-driven methods for dynamical systems
RESEARCH EXPERIENCE	<b>Department of Mathematics &amp; Statistics, UMass Amherst</b> Amherst, MA <i>Postdoctoral Research Associate</i> 09/2022 - Present Mentors: Markos Katsoulakis, Luc Rey-Bellet, Paul Dupuis (Brown University) <b>Department of Aeronautics and Astronautics, MIT</b> Cambridge, MA <i>Postdoctoral associate</i> 01/2022 - 08/2022 <i>Research assistant</i> 09/2015 - 01/2022 Supervised by Professor Youssef Marzouk in the Uncertainty Quantification group. <b>Department of Mechanical Engineering, UC Berkeley</b> Berkeley, CA <i>Undergraduate research assistant</i> 09/2013 - 08/2015 Supervised by Professor Reza Alam.
TEACHING EXPERIENCE	<b>Department of Mathematics and Statistics, UMass Amherst</b> Amherst, MA <i>Lecturer</i> 02/2024 - 05/2024 Designed and delivered new course on Mathematical Machine Learning (MATH 590STA). <b>Department of Aeronautics and Astronautics, MIT</b> Cambridge, MA <i>Course developer</i> 12/2019 - 04/2020 Designed and co-wrote curriculum for MIT xPro online course on Modeling, Simulation, and Machine learning for working professionals. <i>Teaching assistant</i> 01/2019 - 05/2019 Undergraduate probability & statistics for aerospace engineering. Awarded best teaching assistant

award by the students.

**Course developer and co-instructor** Spring 2018, 2019  
Designed curriculum and co-taught course for 16.S685 “A hands-on introduction to computational engineering,” an introductory course targeted at first and second year undergraduates.

**Seminar XL instructor** 09/2018 - 05/2019  
Lead small 18.03 (Differential Equations) study groups for first year URM students. Facilitated by the MIT Office of Minority education.

**Teaching assistant and grader** 09/2018 - 12/2018  
Graduate class on numerical methods for stochastic processes and inference. Also served as informal teaching assistant and held office hours.

**Subject Design Certificate Program** 07/2020  
From the MIT Teaching and Learning lab.

**Department of Mathematics, UC Berkeley** Berkeley, CA

**Teaching assistant** 01/2015 - 05/2015  
Second semester introductory calculus (Math 1B).

PROFESSIONAL  
EXPERIENCE

**United Technologies Research Center, UTC (Now Raytheon)** Berkeley, CA

**Research intern** 06/2017 - 09/2017  
Researched queuing systems for modeling human operators. Also investigated using quantum computing for optimization.

PUBLICATIONS

**Journal articles**

MENTORING

Master’s theses advised:

- Joshua W. (MIT AeroAstro) 2021 – 2022  
Thesis: Rare event simulation via tensor-based approaches to stochastic optimal control

Undergraduate research students advised:

- Hoang Son P. (Umass Amherst REU) 2024
- Ben B. (UMass Amherst REU, Honors Thesis) 2023 – 2024
- Alex R. (UMass Amherst REU) 2023
- Joshua W. (MIT UROP, SuperUROP) 2019 – 2021
- Karolina P. (MIT UROP) 2018 – 2019

AWARDS

- SFB 1294 Data Assimilation Short-term Visiting Research Fellowship 2022
- Mathworks Engineering Fellowship 2019
- AIAA Teaching Assistant Award (Best TA selected by the MIT-AIAA Student chapter) 2019
- NSF Graduate Research Fellowships Program Honorable Mention 2015, 2016
- Phi Beta Kappa 2015
- Summer Undergraduate Research Fellowship (SURF L&S) 2014
- Tau Beta Pi Engineering Honor Society 2013
- Matsui Center Cal-in-Sacramento Fellowship 2013

SERVICE

- Organizer of the *Learning Learning Student Seminar* 2023 – Present
- Organizer of the Uncertainty Quantification Reading Group 2019 – 2021
- ACDL Undergraduate Research Opportunity Coordinator (UROP) 2017 – 2021
- Association of Computational Science and Engineering Students Co-President 2017 – 2018
  - Organized the 2018 and 2019 MIT Center for Computational Engineering annual symposium

*Ad hoc* paper reviewer: *SIAM/ASA Journal on Uncertainty Quantification*; *Probabilistic Engineering Mechanics, Stochastics and Partial Differential Equations*; *SIAM Journal on Scientific Computing*; *Physica D: Nonlinear Phenomena*; *Symposium on Advances in Approximate Bayesian Inference, ICML 2023, 2024*; *I Can’t Believe It’s Not Better Workshop, NeurIPS 2023*; *Deep Generative Models for Health Workshop, NeurIPS 2023*

Minisymposium organization:

- SIAM UQ 2024: *Optimal Transport for Uncertainty Quantification* (4 talks)
- SIAM UQ 2022: *Data-Driven Approaches to Rare and Extreme Events* (8 talks)
- SIAM CSE 2021: *Computational Dynamics meets Computational Statistics* (10 talks)
- SIAM CSE 2019: *Advances in Rare Event Simulation for Dynamical Systems* (8 talks)

INVITED TALKS & SEMINARS

12. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. NYU Shanghai Frontiers Science Center of Artificial Intelligence and Deep Learning, November 16, 2023.
11. **B. Zhang**. A mean-field games laboratory for generative modeling. Computational and Data-enabled Science Seminar, Emory University, October 26, 2023.
10. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. Webinar on Mean-field games and machine learning, October 24, 2023.
9. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. Level Set Collective, UC Los Angeles, Los Angeles, CA, June 26, 2023.
8. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. SRI International, Menlo Park, CA, June 7, 2023.
7. **B. Zhang**. What is Bayesian computation? The What is... Graduate Seminar (TWIGS). UMass Amherst, Amherst MA, November 21, 2022.

6. **B. Zhang**, K. Spiliopoulos, and Y. Marzouk. Novel perturbations for accelerating Langevin sampling. Applied Mathematics and Computation Seminar, UMass Amherst, Amherst MA, October 18, 2022.
5. **B. Zhang**, K. Spiliopoulos, and Y. Marzouk. Transport map unadjusted Langevin algorithm. Aerospace Computational Design Laboratory Seminar, MIT, Cambridge MA, April 1, 2022.
4. **B. Zhang**, T. Sahai, and Y. Marzouk. A Koopman framework for sampling in stochastic dynamical systems. LIDS and Stats Tea Talk, MIT, Cambridge, MA, April 8, 2020.
3. **B. Zhang**, T. Sahai, and Y. Marzouk. A Koopman framework for sampling in stochastic dynamical systems. Aerospace Computational Design Laboratory Seminar, MIT, Cambridge MA, December 6, 2019.
2. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling methods for stochastic dynamical systems using Koopman eigenfunctions. United Technologies Research Center, Berkeley, CA, September 25, 2019.
1. N. Chandramoorthy, and **B. Zhang**. Koopman operators and the problems related to their computation. Aerospace Computational Design Laboratory Seminar, MIT, Cambridge MA, December 7, 2018.

CONFERENCE &  
WORKSHOP  
PRESENTATIONS

18. **B. Zhang** and M Katsoulakis. A mean-field games laboratory for generative modeling, 2024. SIAM Conference on Uncertainty Quantification, Trieste, Italy.
17. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling (poster), 2023. ICERM workshop on Optimal transport in Data Science, Providence, RI. (**Travel grant awarded**)
16. **B. Zhang**, K. Spiliopoulos, and Y. Marzouk. Transport map unadjusted Langevin algorithm: analysis and connections, 2022. SIAM Conference on Mathematics of Data Science, San Diego, CA.
15. **B. Zhang**, Q. Long, J. White, T. Sahai, and Y. Marzouk. Data-driven rare event simulation for stochastic dynamical systems: A Koopman operator approach, 2022. SIAM Conference on Uncertainty Quantification, Atlanta, GA.
14. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling via controlled stochastic dynamical systems (poster), 2021. I Can't Believe It's Not Better Workshop, Neural Information Processing Systems Conference.
13. **B. Zhang**, J. White, T. Sahai, and Y. Marzouk. Rare event simulation for linear SDEs via multilevel splitting, 2021. SIAM Conference on Applications of Dynamical Systems, Portland, OR.
12. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling via controlled stochastic dynamical systems, 2021. SIAM Conference on Computational Science and Engineering, Austin, TX.
11. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling via controlled stochastic dynamical systems, 2020. Second symposium on machine learning and dynamical systems, Fields Institute.
10. **B. Zhang**, T. Sahai, and Y. Marzouk. Importance sampling for linear SDEs using eigenfunctions of the Ornstein-Uhlenbeck operator (poster), 2019. ICERM workshop on Mathematical Optimization of Systems Impacted by Rare, High-Impact Random Events, Providence, RI. (**Travel grant awarded**)
9. **B. Zhang**, T. Sahai, and Y. Marzouk. Rare event simulation in nonlinear dynamical systems via the Koopman operator, 2019. International Congress on Industrial and Applied Mathematics, Valencia, Spain.
8. **B. Zhang**, T. Sahai, and Y. Marzouk. Towards a generalized theory of rare event simulation for linear stochastic differential equations, 2019. SIAM Conference on Applications of Dynamical Systems, Snowbird, UT.
7. Q. Long, **B. Zhang**, Y. Marzouk, A. Gorodetsky, and T. Sahai. Tensor decomposition-based splitting methods for rare event simulation, 2019. SIAM Conference on Applications of Dynamical Systems, Snowbird, UT.
6. **B. Zhang**, T. Sahai, and Y. Marzouk. Efficient simulation of rare events in stochastic differential equations, 2019. SIAM Conference on Computational Science and Engineering, Spokane, WA.

5. **B. Zhang**, T. Sahai, and Y. Marzouk. Rare event simulation for dynamical systems in the presence of an attractor, 2018. SIAM Annual Meeting, Portland, OR.
4. **B. Zhang** and T. Sahai. A probabilistic analysis and rare event study of a dynamical queue for modeling human operators, 2018. SIAM Conference on Uncertainty Quantification, Garden Grove, CA.
3. **B. Zhang**, Y. Marzouk, B.-Y. Min, and T. Sahai. Rare event simulation of a rotorcraft system, 2018. AIAA Scitech Forum Non-deterministic Approaches Conference, Kissimmee, FL.
2. **B. Zhang**, Y. Marzouk, B.-Y. Min, and T. Sahai. Rare event simulation via dynamic importance sampling and measure transport (poster), 2017. USACM Thematic Workshop on Uncertainty Quantification and Data-Driven Modeling, Austin, TX. (**Travel grant awarded**)
1. **B. Zhang**, Y. Marzouk, and T. Sahai. Scalable methods for rare event simulation in rotorcraft systems, 2017. SIAM Conference on Computational Science and Engineering, Atlanta, GA.

WORKSHOPS  
ATTENDED

8. Optimal Transport in Data Science, Institute for Computational and Experimental Research in Mathematics (ICERM), Brown University, May 8-12, 2023.
7. Data Assimilation – Mathematical Foundation and Applications, Mathematisches Forschungsinstitut Oberwolfach (MFO, Oberwolfach Research Institute for Mathematics) , February 20-26, 2022.
6. “I Can’t Believe It’s Not Better” Workshop at the Neural Information Processing Systems Conference (NeurIPS) 2021, held virtually, December 13, 2021.
5. Second Symposium on Machine Learning and Dynamical Systems, Fields Institute for Research in Mathematical Sciences, University of Toronto, September 21-29, 2020.
4. Mathematical Optimization of Systems Impacted by Rare, High-Impact, Random Events, Institute for Computational and Experimental Research in Mathematics (ICERM), Brown University, June 24-28, 2019.
3. Optimal Transport: Numerical Methods and Applications, Lake Como School of Advanced Studies, May 7-11, 2018.
2. USACM Workshop on Uncertainty Quantification and Data-Driven Modeling, Austin TX, March 23-24, 2017.
1. Summer School in Monte Carlo Methods for Rare Events, Division of Applied Mathematics, Brown University, June 13-17, 2016.
