

# BENJAMIN JIAHONG ZHANG

---

|                     |   |  |
|---------------------|---|--|
| CURRENT POSITION    | Postdoctoral Research Associate<br>Division of Applied Mathematics, Brown University  |  |
| CONTACT INFORMATION | Division of Applied Mathematics<br>182 George Street, Room 310<br>Brown University<br>Providence, RI 02912  | Email: <a href="mailto:benjamin_zhang@brown.edu">benjamin_zhang@brown.edu</a><br>Website: <a href="http://benjzhang.github.io">benjzhang.github.io</a> |
| EDUCATION           | <b>Massachusetts Institute of Technology</b> , Cambridge, MA  | 02/2022  |
|                     | <i>PhD, Computational Science and Engineering</i> <ul style="list-style-type: none"><li>• Thesis: <i>Efficient sampling methods of, by, and for stochastic dynamical systems</i></li><li>• Committee: Y. Marzouk, T. Sahai, T. Sapsis, K. Spiliopoulos</li></ul>  |  |
|                     | <i>SM, Aeronautics and Astronautics</i> <ul style="list-style-type: none"><li>• Thesis: <i>A Coupling Approach to Rare Event Simulation via Dynamic Importance Sampling</i></li><li>• Advisor: Y. Marzouk</li></ul>   | 06/2017  |
|                     | <b>University of California, Berkeley</b> , Berkeley, CA  | 05/2015  |
|                     | <i>BS, Engineering Physics</i><br><i>BA, Applied Mathematics</i> , Concentration in Numerical Analysis <ul style="list-style-type: none"><li>• Highest Honors in Applied Mathematics, Distinction in General Scholarship</li><li>• Thesis: <i>A Computational Study of Seizure Attenuation via Anderson Localization</i></li><li>• Advisors: M.-R. Alam (Mechanical Engineering), P.-O. Persson (Mathematics)</li></ul> |  |
| RESEARCH INTERESTS  | Mathematics of machine learning, mathematics of generative modeling, mathematical control theory, rare event simulation, Bayesian computation   |  |
| RESEARCH EXPERIENCE | <b>Division of Applied Mathematics, Brown University</b><br><i>Postdoctoral Research Associate</i><br>Continuation of AFOSR postdoc. Mentors: Paul Dupuis, Markos Katsoulakis, Luc Rey-Bellet   | Providence, RI<br>08/2024 - Present  |
|                     | <b>Department of Mathematics &amp; Statistics, UMass Amherst</b><br><i>Postdoctoral Research Associate</i><br>AFOSR postdoc. Mentors: Markos Katsoulakis, Luc Rey-Bellet, Paul Dupuis   | Amherst, MA<br>09/2022 - 07/2024   |
|                     | <b>Department of Aeronautics and Astronautics, MIT</b><br><i>Postdoctoral associate</i><br><i>Research assistant</i><br>Supervised by Professor Youssef Marzouk in the Uncertainty Quantification group.  | Cambridge, MA<br>01/2022 - 08/2022<br>09/2015 - 01/2022  |
|                     | <b>Department of Mechanical Engineering, UC Berkeley</b><br><i>Undergraduate research assistant</i><br>Supervised by Professor Reza Alam.   | Berkeley, CA<br>09/2013 - 08/2015  |
| TEACHING EXPERIENCE | <b>Division of Applied Mathematics, Brown University</b><br><i>Co-instructor</i><br>Senior seminar: Introduction to Mathematical Machine Learning (APMA 1930Z).   | Providence, RI<br>09/2024-12/2024  |
|                     | <b>Department of Mathematics and Statistics, UMass Amherst</b><br><i>Lecturer</i><br>Designed and delivered new course on Mathematical Machine Learning (MATH 590STA).  | Amherst, MA<br>01/2024 - 05/2024   |

**Department of Aeronautics and Astronautics, MIT** Cambridge, MA  
**Course developer** 12/2019 - 04/2020  
 Designed and co-wrote curriculum for MIT xPro online course on Modeling, Simulation, and Machine learning for working professionals.  
**Teaching assistant** 01/2019 - 05/2019  
 Undergraduate probability & statistics for aerospace engineers (16.09). Awarded best teaching assistant award by the students.  
**Course developer and co-instructor** Spring 2018, 2019  
 Designed curriculum and co-taught course for 16.S685 “A hands-on introduction to computational engineering,” an introductory course targeted at first and second year undergraduates.  
**Seminar XL instructor** 09/2018 - 05/2019  
 Lead small 18.03 (Differential Equations) study groups for first year URM students. Facilitated by the MIT Office of Minority education.  
**Teaching assistant and grader** 09/2018 - 12/2018  
 Graduate class on numerical methods for stochastic processes and inference (16.940).  
**Subject Design Certificate Program** 07/2020  
 From the MIT Teaching and Learning lab.

**Department of Mathematics, UC Berkeley** Berkeley, CA  
**Teaching assistant** 01/2015 - 05/2015  
 Second semester introductory calculus (Math 1B).

PROFESSIONAL  
EXPERIENCE

**United Technologies Research Center, UTC (Now Raytheon)** Berkeley, CA  
**Research intern** 06/2017 - 09/2017  
 Researched queuing systems for modeling human operators. Also investigated using quantum computing for optimization.

PUBLICATIONS

**Journal articles**

## MENTORING

Master's theses advised:

- Joshua W. (MIT AeroAstro) 2021 – 2022  
Thesis: Rare event simulation via tensor-based approaches to stochastic optimal control

Undergraduate research students advised:

- Emily C. (UMass Amherst REU) 2024
- Hoang Son P. (UMass Amherst REU) 2024
- Ben B. (UMass Amherst REU, Honors Thesis) 2023 – 2024
- Alex R. (UMass Amherst REU) 2023
- Joshua W. (MIT UROP, SuperUROP) 2019 – 2021
- Karolina P. (MIT UROP) 2018 – 2019

## AWARDS

|  |            |
|--|------------|
| SFB 1294 Data Assimilation Short-term Visiting Research Fellowship               | 2022       |
| Mathworks Engineering Fellowship   | 2019       |
| AIAA Teaching Assistant Award (Best TA selected by the MIT-AIAA Student chapter) | 2019       |
| NSF Graduate Research Fellowships Program Honorable Mention                      | 2015, 2016 |
| Phi Beta Kappa   | 2015       |
| Summer Undergraduate Research Fellowship (SURF L&S)                              | 2014       |
| Tau Beta Pi Engineering Honor Society  | 2013       |
| Matsui Center Cal-in-Sacramento Fellowship                                       | 2013       |

## SERVICE

|   |             |
|---|-------------|
| Organizer of the <i>Learning Learning Student Seminar</i>                               | 2023 – 2024 |
| Organizer of the Uncertainty Quantification Reading Group                               | 2019 – 2021 |
| ACDL Undergraduate Research Opportunity Coordinator (UROP)                              | 2017 – 2021 |
| Association of Computational Science and Engineering Students Co-President              | 2017 – 2018 |
| • Organized the 2018 and 2019 MIT Center for Computational Engineering annual symposium |             |

*Ad hoc* paper reviewer: *SIAM/ASA Journal on Uncertainty Quantification*; *Probabilistic Engineering Mechanics, Stochastics and Partial Differential Equations*; *SIAM Journal on Scientific Computing*; *Physica D: Nonlinear Phenomena*; *Symposium on Advances in Approximate Bayesian Inference, ICML 2023, 2024*; *I Can't Believe It's Not Better Workshop, NeurIPS 2023*; *Deep Generative Models for Health Workshop, NeurIPS 2023*

Minisymposium organization:

- JMM 2025, SIAM Special Session: *Mathematical perspectives of generative modeling* (10 talks)
- SIAM MDS 2024: *Foundations of Structure-exploiting Flow-based Generative Models* (4 talks)
- SIAM UQ 2024: *Optimal Transport for Uncertainty Quantification* (4 talks)
- SIAM UQ 2022: *Data-Driven Approaches to Rare and Extreme Events* (8 talks)
- SIAM CSE 2021: *Computational Dynamics meets Computational Statistics* (10 talks)
- SIAM CSE 2019: *Advances in Rare Event Simulation for Dynamical Systems* (8 talks)

INVITED TALKS &  
SEMINARS

13. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. Probability Seminar, Division of Applied Mathematics, Brown University.
12. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. NYU Shanghai Frontiers Science Center of Artificial Intelligence and Deep Learning, November 16, 2023.
11. **B. Zhang**. A mean-field games laboratory for generative modeling. Computational and Data-enabled Science Seminar, Emory University, October 26, 2023.
10. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. Webinar on Mean-field games and machine learning, October 24, 2023.
9. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. Level Set Collective, UC Los Angeles, Los Angeles, CA, June 26, 2023.
8. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling. SRI International, Menlo Park, CA, June 7, 2023.
7. **B. Zhang**. What is Bayesian computation? The What is... Graduate Seminar (TWIGS). UMass Amherst, Amherst MA, November 21, 2022.
6. **B. Zhang**, K. Spiliopoulos, and Y. Marzouk. Novel perturbations for accelerating Langevin sampling. Applied Mathematics and Computation Seminar, UMass Amherst, Amherst MA, October 18, 2022.
5. **B. Zhang**, K. Spiliopoulos, and Y. Marzouk. Transport map unadjusted Langevin algorithm. Aerospace Computational Design Laboratory Seminar, MIT, Cambridge MA, April 1, 2022.
4. **B. Zhang**, T. Sahai, and Y. Marzouk. A Koopman framework for sampling in stochastic dynamical systems. LIDS and Stats Tea Talk, MIT, Cambridge, MA, April 8, 2020.
3. **B. Zhang**, T. Sahai, and Y. Marzouk. A Koopman framework for sampling in stochastic dynamical systems. Aerospace Computational Design Laboratory Seminar, MIT, Cambridge MA, December 6, 2019.
2. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling methods for stochastic dynamical systems using Koopman eigenfunctions. United Technologies Research Center, Berkeley, CA, September 25, 2019.
1. N. Chandramoorthy, and **B. Zhang**. Koopman operators and the problems related to their computation. Aerospace Computational Design Laboratory Seminar, MIT, Cambridge MA, December 7, 2018.

CONFERENCE &  
WORKSHOP  
PRESENTATIONS

19. **B. Zhang**, S. Liu, W. Li, M. Katsoulakis, and S. Osher. Wasserstein proximals describe score-based generative models and resolve memorization (poster), 2024. ICERM workshop on Robust Optimization and Simulation of Complex Stochastic Systems, Providence, RI.
18. **B. Zhang** and M Katsoulakis. A mean-field games laboratory for generative modeling, 2024. SIAM Conference on Uncertainty Quantification, Trieste, Italy.
17. **B. Zhang** and M. Katsoulakis. A mean-field games laboratory for generative modeling (poster), 2023. ICERM workshop on Optimal transport in Data Science, Providence, RI. (**Travel grant awarded**)
16. **B. Zhang**, K. Spiliopoulos, and Y. Marzouk. Transport map unadjusted Langevin algorithm: analysis and connections, 2022. SIAM Conference on Mathematics of Data Science, San Diego, CA.
15. **B. Zhang**, Q. Long, J. White, T. Sahai, and Y. Marzouk. Data-driven rare event simulation for stochastic dynamical systems: A Koopman operator approach, 2022. SIAM Conference on Uncertainty Quantification, Atlanta, GA.
14. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling via controlled stochastic dynamical systems (poster), 2021. I Can't Believe It's Not Better Workshop, Neural Information Processing Systems Conference.
13. **B. Zhang**, J. White, T. Sahai, and Y. Marzouk. Rare event simulation for linear SDEs via multilevel splitting, 2021. SIAM Conference on Applications of Dynamical Systems, Portland, OR.

12. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling via controlled stochastic dynamical systems, 2021. SIAM Conference on Computational Science and Engineering, Austin, TX.
11. **B. Zhang**, T. Sahai, and Y. Marzouk. Sampling via controlled stochastic dynamical systems, 2020. Second symposium on machine learning and dynamical systems, Fields Institute.
10. **B. Zhang**, T. Sahai, and Y. Marzouk. Importance sampling for linear SDEs using eigenfunctions of the Ornstein-Uhlenbeck operator (poster), 2019. ICERM workshop on Mathematical Optimization of Systems Impacted by Rare, High-Impact Random Events, Providence, RI. (**Travel grant awarded**)
9. **B. Zhang**, T. Sahai, and Y. Marzouk. Rare event simulation in nonlinear dynamical systems via the Koopman operator, 2019. International Congress on Industrial and Applied Mathematics, Valencia, Spain.
8. **B. Zhang**, T. Sahai, and Y. Marzouk. Towards a generalized theory of rare event simulation for linear stochastic differential equations, 2019. SIAM Conference on Applications of Dynamical Systems, Snowbird, UT.
7. Q. Long, **B. Zhang**, Y. Marzouk, A. Gorodetsky, and T. Sahai. Tensor decomposition-based splitting methods for rare event simulation, 2019. SIAM Conference on Applications of Dynamical Systems, Snowbird, UT.
6. **B. Zhang**, T. Sahai, and Y. Marzouk. Efficient simulation of rare events in stochastic differential equations, 2019. SIAM Conference on Computational Science and Engineering, Spokane, WA.
5. **B. Zhang**, T. Sahai, and Y. Marzouk. Rare event simulation for dynamical systems in the presence of an attractor, 2018. SIAM Annual Meeting, Portland, OR.
4. **B. Zhang** and T. Sahai. A probabilistic analysis and rare event study of a dynamical queue for modeling human operators, 2018. SIAM Conference on Uncertainty Quantification, Garden Grove, CA.
3. **B. Zhang**, Y. Marzouk, B.-Y. Min, and T. Sahai. Rare event simulation of a rotorcraft system, 2018. AIAA Scitech Forum Non-deterministic Approaches Conference, Kissimmee, FL.
2. **B. Zhang**, Y. Marzouk, B.-Y. Min, and T. Sahai. Rare event simulation via dynamic importance sampling and measure transport (poster), 2017. USACM Thematic Workshop on Uncertainty Quantification and Data-Driven Modeling, Austin, TX. (**Travel grant awarded**)
1. **B. Zhang**, Y. Marzouk, and T. Sahai. Scalable methods for rare event simulation in rotorcraft systems, 2017. SIAM Conference on Computational Science and Engineering, Atlanta, GA.

WORKSHOPS  
ATTENDED

11. Sampling, Inference, and Data-Driven Physical Modeling in Scientific Machine Learning, Institute for Pure and Applied Mathematics (IPAM), UCLA, Jan 13-17, 2025. (**Invited speaker**)
10. Random Dynamical Systems, with Applications in Biology, NSF-Simons National Institute for Mathematics and Theory in Biology, Nov 4-8, 2024.
9. Robust Optimization and Simulation of Complex Stochastic Systems, Institute for Computational and Experimental Research in Mathematics (ICERM), Brown University, Sep 13-15, 2024.
8. Optimal Transport in Data Science, Institute for Computational and Experimental Research in Mathematics (ICERM), Brown University, May 8-12, 2023.
7. Data Assimilation – Mathematical Foundation and Applications, Mathematisches Forschungsinstitut Oberwolfach (MFO, Oberwolfach Research Institute for Mathematics) , February 20-26, 2022.
6. “I Can’t Believe It’s Not Better” Workshop at the Neural Information Processing Systems Conference (NeurIPS) 2021, held virtually, December 13, 2021.
5. Second Symposium on Machine Learning and Dynamical Systems, Fields Institute for Research in Mathematical Sciences, University of Toronto, September 21-29, 2020.
4. Mathematical Optimization of Systems Impacted by Rare, High-Impact, Random Events, Institute for Computational and Experimental Research in Mathematics (ICERM), Brown University, June 24-28, 2019.

3. Optimal Transport: Numerical Methods and Applications, Lake Como School of Advanced Studies, May 7-11, 2018.
2. USACM Workshop on Uncertainty Quantification and Data-Driven Modeling, Austin TX, March 23-24, 2017.
1. Summer School in Monte Carlo Methods for Rare Events, Division of Applied Mathematics, Brown University, June 13-17, 2016.
