BENJAMIN JIAHONG ZHANG

EMAIL: bjz@mit.edu   WEBSITE: benjzhang.github.io

EDUCATION	**Massachusetts Institute of Technology**, Cambridge, MA	01/2022

PhD, Computational Science and Engineering

- Thesis: *Efficient sampling methods of, by, and for stochastic dynamical systems*
- Committee: Youssef Marzouk, Tuhin Sahai, Themistoklis Sapsis, Konstantinos Spiliopoulos

SM, Aeronautics and Astronautics — 06/2017

- Thesis: *A Coupling Approach to Rare Event Simulation via Dynamic Importance Sampling*
- Advisor: Youssef Marzouk

University of California, Berkeley, Berkeley, CA   05/2015

BS, Engineering Physics

BA, Applied Mathematics, Concentration in Numerical Analysis

- Graduated Highest Honors in Applied Mathematics, Distinction in General Scholarship
- Thesis: *A Computational Study of Seizure Attenuation via Anderson Localization*
- Advisors: Mohammad-Reza Alam and Per-Olof Persson

RESEARCH INTERESTS

Rare event simulation, Monte Carlo methods, Data-driven methods for dynamical systems, Stochastic differential equations, Bayesian computation

RESEARCH EXPERIENCE

Department of Aeronautics and Astronautics, MIT	Cambridge, MA
Postdoctoral associate	01/2022 - Present

Graduate research assistant   09/2015 - 01/2022
Supervised by Professor Youssef Marzouk in the Uncertainty Quantification group.

Department of Mechanical Engineering, UC Berkeley	Berkeley, CA
Undergraduate research assistant	09/2013 - 08/2015

Supervised by Professor Reza Alam. Studied noninvasive seizure attenuation methods via Anderson localization.

TEACHING EXPERIENCE

Department of Aeronautics and Astronautics, MIT	Cambridge, MA
Course developer	12/2019 - 04/2020

Designed and co-wrote curriculum for MIT xPro online course on Modeling, Simulation, and Machine learning for working professionals.

Teaching assistant   01/2019 - 05/2019
Undergraduate probability & statistics for aerospace engineering. Awarded best teaching assistant award by the students.

Course developer and co-instructor   Spring 2018, 2019
Designed curriculum and co-taught course for "A hands-on introduction to computational engineering," an introductory course targeted at first and second year undergraduates.

Seminar XL instructor   09/2018 - 05/2019
Lead small 18.03 (Differential Equations) study groups for first year URM students. Facilitated by the MIT Office of Minority education.

Teaching assistant and grader   09/2018 - 12/2018
Graduate class on numerical methods for stochastic processes and inference. Also served as informal teaching assistant and held office hours.

Subject Design Certificate Program   07/2020
From the MIT Teaching and Learning lab.

Department of Mathematics, UC Berkeley	Berkeley, CA
Teaching assistant	01/2015 - 05/2015

Second semester introductory calculus.

PROFESSIONAL EXPERIENCE	**United Technologies Research Center, UTC**	Berkeley, CA

United Technologies Research Center, UTC — Berkeley, CA

Applied Mathematics Intern — 06/2017 - 09/2017

Researched queuing systems for modeling human operators. Also investigated using quantum computing for optimization.

California State Assembly — Sacramento, CA

Legislative Intern — 05/2013 - 07/2013

Analyzed policy and wrote briefs related to natural resources, environmental regulation, hydraulic fracturing, and services for the developmentally disabled. Responded to constituent affairs.

MENTORING

Undergraduate research students advised:
- Joshua W. (MIT UROP and SuperUROP) — 2019 - 2021
- Karolina P. (MIT UROP) — 2018 - 2019

HONORS

Mathworks Engineering Fellowship	2019
AIAA Aeronautics & Astronautics Teaching Assistantship Award	2019
NSF Graduate Research Fellowships Program Honorable Mention	2015, 2016
Phi Beta Kappa	2015
Summer Undergraduate Research Fellowship (SURF L&S)	2014
Tau Beta Pi Engineering Honor Society	2013
Matsui Center Cal-in-Sacramento Fellowship	2013

SERVICE

Journal referee for SIAM Journal on Scientific Computing (SISC)	2021
Journal referee for Physica D: Nonlinear Phenomena	2020
SIAM UQ 2022 Minisymposium organizer Title: *Data-Driven Approaches to Rare and Extreme Events* (8 talks)	2022
SIAM CSE 2021 Minisymposium organizer Title: *Computational Dynamics meets Computational Statistics* (8 talks)	2021
SIAM CSE 2019 Minisymposium organizer Title: *Advances in Rare Event Simulation for Complex Dynamical Systems* (10 talks)	2019
Organizer of the Uncertainty Quantification Reading Group	2019 - 2021
ACDL Undergraduate Research Opportunity Coordinator (UROP)	2017 - 2021
Association of Computational Science and Engineering Students Co-President	2017 - 2018

- Organized the 2018 and 2019 MIT Center for Computational Engineering annual symposium
